Malta - a bucket list country for digital nomads

Malta has been attracting young digital expats for years now, ever since the Island became a hub for gaming companies. Since then Malta has become a multi-cultural, cosmopolitan country that has adapted to the change of global mobility.

With millions of people on the move worldwide and the increasingly popular trend to work remotely, Malta has become the latest country to acknowledge this global development and launch a Nomad Residence Permit to attract third country nationals to its shores.

Malta has the sun to warm the heart, the sand to massage the toes and the sea to cleanse the soul. It is never too late to start a digital nomad life in such agreeable conditions.

Malta ticks all the boxes for digital nomads...
